

ZUBAIR IQBAL

Civil QC Inspector – Saudi Aramco, SABIC and JIGPC Approved

Vendor Code Transferable | Immediate Availability

Mobile: +966 554 013 283

Email: engrzubair2322@gmail.com

Location: Jubail, Kingdom of Saudi Arabia

PROFESSIONAL SUMMARY

To strive for excellence in the field of Civil Quality Control; with dedication, focus, protective approach, positive attitude, passion and to utilize my knowledge, skills in the best possible way for the fulfillment of organizational goals. I am probing for a responsible post with an opportunity for professional challenges and growth to support and enhance cooperative objectives of the company.

CORE COMPETENCIES

- Saudi Aramco SAES / SAEP / SATIP Compliance
- SABIC Engineering Standards (SES) Compliance
- Inspection Test Plan (ITP) Implementation & Monitoring
- Request for Inspection (RFI) & PID Coordination
- Material Inspection Request (MIR) & Submittal Review
- SOR / QOR issuance & Corrective Action Closure
- NCR / INCR Issuance & Corrective Action Closure
- Concrete Works Inspection (ASTM / ACI Standards)
- Mass Concrete Temperature & Thermal Control Monitoring
- Excavation and backfilling
- Piling work
- Pipeline ROW, Trench Excavation, Pipe Lowering and backfilling
- Reinforcement, Formwork & Foundation Inspection
- Concrete Repairs Work
- Security Precast foundation
- Concrete Coating
- Waterproofing & Industrial Civil Structures
- Root Cause Analysis & Quality Improvement
- QA/QC Documentation & Log Management

EDUCATION

- Bachelor of Science in Civil Engineering – COMSATS University Islamabad

PROFESSIONAL EXPERIENCE

1. Civil QC Inspector – HCIS Security Compliance Project (2A/2B), Jubail | Client: SABIC | Jul 2025 – Feb 2026

- Conducted inspections in compliance with SABIC Engineering Standards (SES).
- Reviewed material submittals, test reports, and quality documentation.
- Supervised formwork, reinforcement and concrete work.
- Monitored batching time, concrete temperature, slump tests, and compressive strength sampling.
- Witnessed moisture and DFT test.
- Pre-cast foundations like Line post, brace post, gate post, camera pole, light pole, card reader, handholes and other security foundations.
- Ensured waterproofing and civil works complied with approved specifications.
- Receiving of materials and raising MIR accordingly.
- Raised RFIs and MRI's and coordinated inspections with Sabic PID representatives.
- Issuance of QOR and its timely close up.
- Reviewed and implemented approved Method Statements and ITPs.
- Managed NCR issuance and corrective action follow-up with construction team.
- Maintained full documentation traceability in line with SABIC QMS procedures.

2. Civil QC Inspector – FRP Cooling Water Project, Yanbu | Client: SABIC | April 2025 – June 2025

- Conducted inspections in compliance with SABIC Engineering Standards (SES).
- Supervised deep excavation, backfilling, compaction, and structural concrete works.
- Monitored batching time, concrete temperature, slump tests, and compressive strength sampling.
- Ensured lamination of FRP.
- Reviewed and implemented approved Method Statements and ITPs.
- Raising of RFI according to approved ITP.
- Issuance of QOR and its timely close up.
- Managed NCR issuance and corrective action follow-up with construction team.
- Maintained full documentation traceability in line with SABIC QMS procedures.

3. Civil QC Inspector – Collection Basin Repairs Work, Jizan | Client: JIGPC & Aramco | Jan 2025 – April 2025

- Executed civil inspections in accordance with SAES, SATIP, SAIC and project specifications.
- Performed ERT, MASW and DPT tests on site.
- Reviewed and implemented approved Method Statements and ITPs.
- Inspected concrete repair works and concrete repair injections.
- Repairing of expansion and isolation joints of collection basin.
- Repairing of concrete by form and pump technique.
- Repairing of concrete by patch repair method.
- Repairing of concrete with crack injections procedure.
- Performed soil injection with a chemical grouting is to strengthen soil bearing capacity.
- Verified reinforcement size, spacing, lap length and concrete cover.
- Raised RFIs and coordinated inspections with JIGPC PID representatives.
- Issued NCR/INCR and ensured corrective action implementation and closure.
- Maintained RFI, MIR, QOR, and NCR logs as per Aramco QMS requirements.

4. Civil QC Inspector – Gas Compression Plant, Safaniyah | Client: Saudi Aramco | Feb 2023 – Oct 2024

- Performed inspection of civil and structural works for Gas Compression Plant facilities including compressor foundations, pipe racks, control buildings, and equipment foundations.
- Ensured compliance with Saudi Aramco project specifications, approved drawings, Project Quality Plan (PQP), and Inspection & Test Plan (ITP).
- Conducted pre-pour inspections of heavy equipment foundations including anchor bolts alignment, embedment verification, bolt projection, and grout pocket preparation.
- Verified foundation elevations, centerlines, and coordinates in coordination with survey team prior to concrete placement.
- Inspected deep excavations, shoring works, backfilling, and compaction activities for underground utilities and foundations.
- Witnessed Field Density Tests (FDT), soil compaction tests, and backfilling activities around underground piping and cable trenches.
- Monitored concrete works including batching, slump testing, temperature control, cube sampling, mass concrete monitoring, and curing procedures.
- Inspected rebar installation (size, spacing, lap length, cover blocks, supports) as per approved shop drawings.
- Verified formwork system, alignment, dimensions, and surface preparation prior to concrete pouring.
- Conducted inspections for pipe rack foundations, pedestals, slabs-on-grade, and structural concrete elements.
- Inspected grouting works for compressor skids, base plates, and rotating equipment foundations.
- Verified waterproofing works for underground structures and manholes.
- Raised Non-Conformance Reports (NCR) for deviations and ensured corrective actions were implemented before proceeding with next activities.
- Coordinated with Saudi Aramco representatives for witness and hold point inspections.
- Maintained quality documentation including RFI logs, inspection reports, concrete pour cards, material approval records, and test reports.
- Ensured calibration validity of testing equipment and compliance with site quality control procedures.
- Supported internal audits and client quality audits by maintaining complete and traceable QC records.

5. Civil QC Inspector – Saline Water Conversion Plant, Ras Al Khair | Client: Marafiq | Oct 2021 – Dec 2022

- Perform inspection of civil works including foundations, tanks, pipe supports, pump bases, and structural elements.
- Monitor excavation, backfilling, compaction, and PCC works as per approved ITP and drawings.
- Inspect reinforcement, formwork, embedment, and anchor bolts prior to concrete pouring.
- Witness concrete activities including slump test, temperature check, and cube sampling.
- Supervise waterproofing works for underground structures, tanks, and wet areas.
- Ensure compliance with project specifications, method statements, and quality standards.
- Conduct material receiving inspection and verify approved submittals.

- Raise NCRs for non-conformance and follow up on corrective actions.
- Maintain QA/QC documentation including IRs, WIRs, MIRs, and daily inspection reports.
- Coordinate with consultant and client representative for inspection approvals

6. Civil Inspector – Lakeshore Towers, Islamabad | Client: Designmen | Jan 2020 – Aug 2021

- Inspect piling works including bore depth, diameter, reinforcement cage installation, and concrete pouring.
- Monitor pile integrity tests and maintain inspection records.
- Verify foundation works including excavation, PCC, rebar installation, formwork, and concrete placement.
- Ensure waterproofing works (raft, basement, retaining walls) are applied as per approved method statement and specifications.
- Conduct material inspections and verify approved submittals before use on site.
- Witness field tests such as slump test, sampling, and compaction tests.
- Ensure compliance with project specifications, approved drawings, and quality standards.
- Raise NCRs for non-conforming works and follow up on corrective actions.
- Coordinate with consultant, contractor, and site team for inspections and approvals.
- Maintain daily inspection reports and QA/QC documentation.
