

Razan Abdullah Asiri

Cybersecurity | SOC Analyst | Threat Detection | Incident Response

+966 557 657 412 razan.abdullahasiri@gmail.com [Razan Asiri](#) Saudi Arabia

PROFESSIONAL PROFILE

Motivated and eager Cybersecurity graduate with foundational knowledge in SOC operations, threat detection, and incident response. Skilled in analyzing system logs, supporting IT security measures, and learning to implement proactive security practices. Enthusiastic about contributing to team efforts, developing professional skills, and leveraging emerging technologies to strengthen organizational security.

PROFESSIONAL EXPERIENCE

Centennial Higher Institute for Training – TVTC | Saudi Arabia

Cybersecurity Trainer | November 2025 – Present.

Key Achievements

- Designed and implemented lab exercises, enhancing hands-on learning experiences effectively.
- Linked theoretical concepts to real-world scenarios, boosting trainees' operational confidence.

Core Responsibilities

- Conduct cybersecurity and network security foundational courses for diverse learners.
- Educate students on threat types, attack vectors, and mitigation strategies.

Riyad Bank (Via Outsourcing Company) | Saudi Arabia

IT Support & Operations Coordinator | October 2021 – October 2025.

Key Achievements

- Supported critical banking operations, ensuring secure IT system availability and reliability.
- Monitored systems proactively, reducing incident resolution time by 25%.

Core Responsibilities

- Monitor systems, escalate incidents, and resolve technical issues promptly.
- Maintain detailed incident logs and prepare operational reports consistently.

Al Majal Group for Security & Safety (G4S) | Saudi Arabia

Systems Technician | October 2021 – May 2023.

Key Achievements

- Maintained and configured security systems, enhancing operational reliability and safety.
- Analyzed system logs, identifying performance issues and potential vulnerabilities proactively.

Core Responsibilities

- Maintain security systems and adjust configurations to ensure optimal performance.
- Analyze performance logs and troubleshoot technical issues accurately.

King Abdullah bin Abdulaziz University Hospital | Saudi Arabia

Programming Intern | February 2021 – May 2021.

Key Achievements

- Developed a secure electronic blood bank system, improving data integrity and patient safety.
- Programmed front-end and back-end modules, ensuring seamless system functionality.

Core Responsibilities

- Design and develop secure electronic blood bank applications effectively.
- Code front-end and back-end components for hospital management systems.

ACADEMIC BACKGROUND

Digital Technical College for Girls | Saudi Arabia

Bachelor's Degree in Cybersecurity

CERTIFICATIONS & COURSES

- CompTIA Security+.
- Cisco Certified Network Associate (CCNA).
- AWS Cloud Foundations | AWS Academy.
- Cybersecurity Foundation | CertiProf.
- PCAP: Programming Essentials in Python.
- NDG Linux Unhatched | Cisco.
- AI Fundamentals with Capstone Project | IBM.

PROJECTS

- Quantum Shield – Cybersecurity Project.
- Blood Donation System – University Project.

SKILLS

Strategic & Analytical Thinking

- Critical Thinking & Problem Solving.
- Risk Assessment & Decision-Making.
- Analytical Evaluation & Strategy.
- Process Development.

Leadership & Team Management

- Team Supervision & Performance Monitoring.
- Staff Development & Mentoring.
- Process Improvement.
- Workflow & Operational Coordination.

Expertise & Compliance

- Cybersecurity Fundamentals.
- Vulnerability Assessment.
- Incident Response.
- Network Monitoring.

Technical & Productivity Tools

- Log Analysis.
- Threat Detection.
- Firewall Management.
- SIEM Tools.

LANGUAGES

- Arabic.
- English.
