

Qasem Altunusi

Civil Engineer

📍 Riyadh, Saudi Arabia | Saudi National | ✉ Eng.qasem73@gmail.com | 📞 +966 54 8355675

PROFESSIONAL SUMMARY

Civil Site Engineer with solid experience in site supervision, construction management, and quality assurance across various projects. Experienced in overseeing daily site operations, ensuring compliance with drawings, specifications, and safety standards, and coordinating effectively with consultants, contractors, and project stakeholders. Demonstrates strong leadership, organizational, and problem-solving abilities, with a strong commitment to delivering projects efficiently, safely, and to the highest quality standards. Motivated to contribute to a reputable, growth-oriented organization while continuously enhancing professional and managerial capabilities.

EDUCATION

Bachelor of Civil Engineering, Aljouf University — May 2021

Graduation Project: Structural Design of a Multi-Story Building

PROFESSIONAL EXPERIENCE

Methaq Contracting Company — Site Engineer

Riyadh, Nov 2021 – Present

I supervise various construction activities on site, ensuring compliance with project specifications, safety regulations, and quality standards. I oversee structural works, coordinate with QA/QC teams to verify material quality through concrete and soil testing, and monitor daily site progress. Additionally, I prepare progress reports, review contractor payment certificates based on executed quantities, and coordinate with suppliers to ensure timely delivery of essential construction materials.

Abdullah & Khaled Al-Mutlaq Engineering Consulting — Site Engineer

Riyadh, Jun 2021 – Nov 2021

I worked as a consultant site engineer responsible for supervising contractor activities and inspecting executed works to ensure compliance with approved drawings, specifications, and quality standards. I conducted site inspections, reviewed material submittals and method statements, and verified completed works before granting approvals. I also coordinated with contractors to address observations and ensure proper implementation of corrective actions.

Ministry of Education — Engineering Trainee
