## RESPONSIBILITIES

- Application of technical principles, theories, concepts and quality sciences, tools and systems with measurable / confirmed results.
- Ensure the contractors are complying with the project quality plan requirements
- Review Engineering drawings and changes to assure that they are properly dimensioned and provide proper inspectability for the related component.
- Monitor the inspection of sub-base and base layers, stabilized layers, prime coat, asphalt base and top layers, concrete roads, open ditch lining, precast curbstones, shoulders, and signing and marking. As well as witness the tests and measurements to be taken for compaction, thickness, slope, bonding, and other quality criteria
- Undertake quality surveillance and audits at site.
- Manage Personal qualifications for special processes.
- Manage Quality records.
- Prepare and report quality metrics related to site activities regularly to the Quality Manager.
- Monitor and register the execution of correction and corrective actions.
- Lead and support the root-cause analysis of non-conformities detected at site.
- Lead and support various functions and processes to ensure continuous improvements at site.
- Prepare ITPs as per project specification/ company standards.
- Reviewing the construction method statements (MS) and making comments as per project specifications, procedures & Inspection Test Plan (ITP).

- Preparation of PQI (Project Quality Index) on monthly basis for the quality evaluation.
- Verify the internal quality performance & maintain the quality system as client satisfaction and company minimum quality requirements.
- Coordination with civil testing agencies / batching plants for in-time delivery of concretes and subsequent inspection & testing requirements. Ensuring the availability of QC Inspector during any operations.
- Coordination with Client inspectors for getting the feedback for open logbook entries (LBEs) and follow-up of corrective actions to close those violations within Agreed Completion Date (ACD).
- Checking the Internal Non-conformance Report (INCR) issued by the inspectors.
- Manages Control of documents and records by advising the document controllers, QC Inspectors.
- Reviews the third-party laboratory test results\reports.
- Conducting routine internal meetings with QC inspectors for further vigilance to the potential problems which must be tackled accordingly to avoid non-conformity.
- Reporting all related activities to QA/QC Manager.
- Perform other duties as assigned by the line manager/supervisor.
- Implement all the QC system on the site and assure inspections are carried out as per schedule and procedure
- Preparation of Daily construction activities inspection.
- Verify and check the job conformance of the work with Saudi Aramco standards and project specification prior to issuance of final inspection.
- Coordinate to Saudi Aramco Representative (PMT & PID).
- Prepare request for inspection (RFI) 24 hours prior to actual schedule of inspection to the particular activity.
- Supervise layout, form works, reinforcement, concrete and finishing utilities as per contract, approved drawings, project specification.

- Providing site management services and Quality assurance /control mechanisms for Earth works, asphalt works, Bar bending schedule, CMU installation, Precast / cast in situ concrete, Grouting, ready mix concrete, for Reinforced concrete structure.
- Ensured all site personnel used quality workmanship in accordance with plans and client needs.
- Adjusted work schedules as needed in order to meet all project deadlines.
- Read blueprints and plans and communicated them to workers.
