PROFESSIONAL SUMMARY

Results-driven Site and Technical Office Engineer with over 5 years of experience in construction management, site supervision, and project coordination. Skilled in blueprint interpretation, structural inspection, and material estimation, ensuring compliance with engineering standards, safety regulations, and project specifications. Successfully oversaw the structural analysis and execution of a high-profile construction projects, ensuring completion within budget and ahead of schedule, while maintaining the highest safety and quality standards. Experienced in technical analysis, contract management, and cost control, optimizing project efficiency and resource allocation. Seeking a challenging role to leverage expertise in engineering design, quantity surveying, and schedule monitoring in a dynamic organization to enhance project performance, worksite optimization, and long-term operational success.

KEY COMPETENCIES

- Site Supervision
- Quality Assurance
- Material Estimation
- Structural Inspection
- Risk Assessment
- Progress Reporting
- Revit
- AutoCAD
- Microsoft Office
- Teamwork
- Problem Solving
- Attention to Detail

PROFESSIONAL EXPERIENCE

Site and Technical office Engineer

Sep 2025 - Present

Mozn Real Estate Developer Company | Mozn Al Safa Project

- Reviewed construction drawings to ensure compliance with approved design documents prior to execution.
- Performed quantity take-offs and validated BOQ items to ensure cost accuracy.
- Conducted technical and financial comparison of contractor bids and submitted evaluation reports management.
- Supervised structural works (foundations, concrete works, and structural elements) ensuring compliance with specifications and quality standards.
- Coordinated shop drawings and material submittals approval process with consultants and contractors.
- Monitored project progress against schedule and reported site updates to management.
- Prepared and verified contractor Interim Payment Certificates (IPCs), ensuring alignment between executed works and financial claims.

Site and Technical Office Engineer

Sep 2021 - Sep 2025

Al-Henna Contracting Company | Esnad logistic Base & Transportation Base Projects - National Guard Riyadh

- Manage and supervise structural, architectural, and civil works, ensuring seamless execution from excavation to finishing stages.
- Conduct pre-casting inspections for structural elements, ensuring adherence to regulations, standards, and quality benchmarks.
- Develop and review shop drawings, technical submittals, and construction documentation to maintain project accuracy and efficiency.
- Track construction milestones, prepare progress reports, and provide updates to the project manager on potential risks.
- Lead site teams, ensuring labor productivity, adherence to health and safety standards, and seamless project execution.

Site Engineer

Oct 2019 - Aug 2021

ID PRO Company | Waleed al Ibrahim Villa Project & Falafel Pie Project

- Supervised on-site construction activities to ensure compliance with approved drawings and safety regulations.
- Coordinated with subcontractors, labor teams, and suppliers to maintain project schedules and quality standards.
- Oversaw fit-out, decoration, tiling, gypsum board, plastering, painting, interlock, and landscaping.
- Conducted quantity surveying and material estimation to support budget control and procurement planning.

PROFESSIONAL CERTIFICATIONS

- Building Information Modeling (BIM) Using Revit Software | Integrated Learning | Aug 2023
- Structural Analysis Using SAFE & SAP & ETABS Software | Integrated Learning | Jun 2023
- Certified Maintenance & Reliability Professional | Integrated Learning | Aug 2025

LANGUAGES

- Arabic: Native
- English: Professional Working Proficiency

EDUCATION

Bachelor's Degree in Civil Engineering
Philadelphia University - Jordan | 2015-2019
