SOFTWARE SKILLS

- AutoCAD
- Civil 3D
- GIS

PERSONAL SKILLS

- Attention to Detail
- Problem Solving
- Teamwork
- Time Management
- Communication
- Adaptability

Languages

Arabic: Native

English: Good

PROFESSIONAL SUMMARY

Land Surveyor with 12+ years of experience delivering high-precision topographic, boundary, and construction layout surveys across infrastructure and urban development projects. Skilled in AutoCAD, Civil 3D, and GNSS/Total Station technologies, ensuring data accuracy and compliance. Proven in supporting large-scale projects, optimizing execution, and maintaining engineering standards.

Education

Bachelor of Arts in Geography (Surveying Specialization)

Jun 2013

Kafrelsheikh University – Egypt

EXPERIENCE

Surveyor

2024 - Present

Zaid Al Hussein & Brothers Contracting Group – Riyadh, Saudi Arabia

Is Responsible For:

- Executing topographic and boundary surveys for major infrastructure and urban development projects.
- Performing setting out and alignment works to ensuring accurate construction layout.
- Utilizing Total Station and GNSS equipment to maintaining precise measurements and site control.

Projects:

- Northern Ring Road
- Western Ring Road
- Southern Ring Road
- Al-Badi'ah District
- Namar District

Senior Surveyor

2017 - 2024

Alshorouk Construction

Was Responsible For:

- Conducting high-precision surveying activities for national infrastructure projects.
- Performing setting out and alignment operations to ensuring compliance with engineering designs.
- Supporting major projects execution with accurate surveying data and layouts.

Projects:

- Salloum Wild Port Development
- Egyptian-Japanese University

Surveyor

2015 - 2017

Hassan Allam Sons

Was Responsible For:

- Providing technical surveying support for Beni Suef Cement Factory project.

- Performing site leveling, underground works, and electromechanical alignments.
- Managing control points and ensuring accuracy of construction data across project phases.

Projects:

- Beni Suef Cement Factory

Surveyor

2014 - 2015

Luxury Building Group – Saudi Arabia

Was Responsible For:

- Conducting site surveying and supervising technical layout activities.
- Performing setting out for foundations, infrastructure works, and drainage networks.
- Utilizing Total Station and leveling tools to maintaining accurate elevations and coordinates.

Projects:

- University of Kharma

Surveyor

Petrojet

Was Responsible For:

- Supporting large-scale infrastructure projects through topographic surveying tasks.
- Performing construction layout activities to assisting project execution.
- Gaining hands-on experience in surveying tools and field data collection techniques.

Projects:

- Large-Scale Infrastructure Projects (Various Locations)

CAREER SKILLS

- **Topographic Surveying:** Conducting accurate land measurements and terrain mapping to support engineering and construction planning.
- **Construction Layout:** Performing precise setting out and alignment to ensuring structures follow design specifications.
- **GNSS & GPS Surveying:** Utilizing advanced positioning systems to collecting high-accuracy geospatial data.
- **Data Analysis & Documentation:** Preparing detailed reports and interpreting survey data for project teams.
- **Infrastructure Project Support:** Managing surveying operations for roads, utilities, and large urban development projects.
