Professional Experience

Nursing Specialist – Emergency and Trauma

Azhar Al Asima Medical Services Center, Tabuk, Saudi Arabia

Apr 2024 – Feb 2026

- Performed **triage, vital signs assessment, and ongoing monitoring** for emergency and trauma patients, supporting timely care decisions in a busy medical services environment.
- Delivered emergency nursing care including **CPR, IV fluid administration, medication support, and personal patient care**, contributing to smooth daily clinical operations.
- Assisted with **ambulance transfer of critical cases** and helped maintain responsive departmental workflow, supporting safe patient handover and continuity of care.

Site Nurse

Samsung / SHAJV, NEOM Spine Infrastructure Project, Saudi Arabia

Jan 2024 – Jan 2025

- Provided frontline nursing support for workforce health needs at a large infrastructure project site, addressing minor injuries, urgent health concerns, and basic emergency response.
- Supported implementation of **health and safety requirements** on site and contributed to a safe work environment through prompt case response and practical health guidance.
- Earned recognition for commitment to **HSE culture and workplace safety**, reflecting consistent compliance and dependable field support.

Second Nursing Specialist – Emergency Room

Royal Care International Hospital, Sudan

Aug 2022 – Apr 2023

- Supported ER operations by assisting with patient intake, emergency nursing care, and clinical monitoring in a hospital setting.
- Worked closely with physicians and nursing colleagues to deliver timely patient care and maintain accurate bedside follow-up.
- Contributed to efficient care delivery and dependable shift coverage, with documented excellent performance and punctuality.

Second Specialist Nursing

Military Hospital, Sudanese Armed Forces Medical Services, Sudan

May 2021 – May 2022

- Rotated across **Internal Medicine, Surgery, Obstetrics & Gynecology, Pediatrics, and Accident & Emergency**, building broad clinical exposure in hospital nursing practice.
- Assisted in patient care delivery, treatment support, and routine monitoring under departmental nursing protocols.
- Developed adaptable clinical judgment and teamwork skills while serving in a structured

multidisciplinary hospital environment.
