Professional Summary

Civil Engineer with over 12 years of experience in infrastructure, structural, and finishing projects across Saudi Arabia and Jordan. Possesses extensive experience in project management, construction supervision, site engineering, and quality assurance. Capable of leading large construction projects, organizing cross-functional teams, and ensuring compliance with safety and engineering standards. Skilled in project planning, resource allocation, budgeting, risk mitigation, and stakeholder communication. A proactive leader with strong technical, analytical, and interpersonal skills committed to achieving excellence in all aspects of project management.

Professional Experience

Structural & Finishing Engineer – Al Faz Contracting Company – Jordan | 2024 – Present

- Supervised all structural and finishing works on-site, ensuring alignment with design specifications.
- Coordinated construction phases, ensuring seamless communication between design, procurement, and site teams.
- Monitored subcontractor performance and ensured compliance with deadlines.
- Conducted quality inspections and implemented corrective actions when necessary.
- Ensured full compliance with health, safety, and environmental regulations.

Project Manager – The Infinite Construction Company – Jordan | 2022 – 2024

- Led the project from planning to execution, ensuring timely delivery within budget.
- Managed site activities, including resource planning, contractor coordination, and stakeholder communication.
- Oversaw technical operations, including structural works, utilities, and finishing.
- Implemented risk management plans to handle site challenges and safety issues.
- Ensured compliance with local codes and client specifications.

Civil Engineer | Heavy Equipment Engineer | Safety Engineer | Planning Engineer – Saudi Binladin Group – Saudi Arabia | 2012 – 2020

- Supervised site construction works and managed subcontractor teams.
- Oversaw heavy equipment operations, ensuring efficiency and safety.
- Implemented safety management systems, including risk assessments and compliance with HSE standards.
- Supported project planning and scheduling, coordinating manpower, machinery, and resources.
- Reviewed shop drawings, technical documents, and coordinated with consultants.
