Saudi Arabia

A highly skilled civil engineer with over three years of experience in structural design, site supervision, and infrastructure projects. Proficient in facility maintenance and site monitoring, as well as working on road maintenance projects for a leading road construction company, ensuring structural safety and operational excellence. I have a proven track record in managing engineering and consulting offices, with a strong focus on occupational health and safety, implementing rigorous safety standards and risk mitigation strategies in my work as an occupational health and safety engineer.
