## Objective

Results-oriented QA/QC Civil with over 13 years of experience in managing and ensuring the quality of civil engineering projects. Proven ability to apply a wide range of testing methods, manage inspections, and ensure compliance with engineering and regulatory standards. Eager to contribute technical expertise and leadership skills to deliver exceptional results on large-scale projects.

## Professional Experience

### Civil Engineer

Currently, I'm working in Yanpet affiliate of Sabic in Yanbu industrial City at inspection department from May 2025 up to now.

Making inspection for Concrete and steel structure such as foundation, footing, sump and dikes, as well as reviewing the reports which one comes from vendors and gives them recommendation based on Sabic standards. Involved in different kind of projects inside the plant such as maintenance project and construction project.

### QA/QC Civil Inspector

Khonaini International Company – Yaserf Housing Project in Yanbu industrial City.

March 2020 – March 2025

- Lead quality inspections for foundation, steel reinforcement, formwork, and slab structures to ensure compliance with project specifications and safety standards.
- Oversee finishing work including plastering, tiling, painting, and waterproofing, ensuring all tasks meet required quality standards.
- Supervise and perform testing for concrete compaction and concrete pouring activities, ensuring adherence to engineering requirements.
- Maintain comprehensive documentation of quality control processes and generate regular reports for project stakeholders.

### QA/QC Engineer

Enjaz Company for Trading & Contracting in Yanbu industrial City.

March 2018 – March 2020

- Managed the inspection of excavation, backfilling, compaction, and structural waterproofing for various civil infrastructure elements.
- Supervised testing procedures for soil and concrete, ensuring project specifications were

met for pile work and other structural foundations.

- Coordinated testing and quality control processes, ensuring the timely and efficient completion of civil projects.

### **Civil Engineer**

China Railway 18th Bureau Group Co. Ltd in Yanbu industrial City.

May 2016 – February 2018

- Led civil engineering projects, including excavation, backfilling, and waterproofing, ensuring adherence to engineering standards and project deadlines.
- Conducted inspections of civil structures including electrical and telecom manholes and duct banks.
- Ensured quality control throughout construction processes, including supervision of soil and concrete testing.

### **Geotechnical Engineer**

Osaimi Engineering Office in Yanbu industrial City.

January 2011 – August 2013

- Conducted geotechnical analysis, including pile load testing, dynamic compaction, coring, and soil characterization.
- Performed various tests such as plate load tests, electrical resistivity, and groundwater monitoring for major infrastructure projects.
- Compiled and analyzed geotechnical data, producing detailed reports for engineers and project managers.

### **Certifications & Approvals**

- Certified Engineer – Saudi Council of Engineers
- QA/QC Engineer Approval – Royal Commission in Yanbu
- QA/QC Civil Inspector – Yaserf affiliate of Aramco

### **Technical Skills**

- Software: AutoCAD, Microsoft Excel, PowerPoint
- Testing & Inspection: Concrete slump tests, soil compaction tests, load-bearing tests, pile testing, dynamic compaction, waterproofing techniques
- Languages: Fluent in Arabic and English (written and spoken)
- Reporting: Skilled in writing detailed technical reports in English

### **Courses & Training**

- AutoCAD Program – Private Orientation, Yanbu (2 Months)
- English Language Program – Ministry of Higher Education, Canada (2 Years)
- Diploma in Human Resources – Jeddah (4 Weeks)
- PMP Online orientation for (32 Hours)
