## **Duties and Responsibilities:**

A FireFighting, Chiller Water Pipe, and Ducting Work Supervisor oversees the installation, maintenance, and repair of firefighting systems, chiller water pipe systems, and ducting systems. Here are key duties and responsibilities:

### **\*Primary Responsibilities:\***

- 1. \* Supervising Installation and Maintenance\*:** Overseeing installation, maintenance, and repair of firefighting, chiller water pipe, and ducting systems.
- 2. \* System Inspections\*:** Conducting regular inspections to ensure compliance with codes, regulations, and industry standards.
- 3. \* Troubleshooting\*:** Identifying and resolving issues with systems, ensuring minimal downtime.
- 4. \* Quality Control\*:** Ensuring work meets quality standards and regulatory requirements.
- 5. \* Team Management\*:** Supervising and directing technicians, installers, and other team members.
- 6. \* Material Management\*:** Procuring and managing materials, tools, and equipment.
- 7. \* Safety Compliance\*:** Ensuring adherence to safety protocols, regulations, and industry standards.
- 8. \* Documentation\*:** Maintaining records of work performed, inspections, and testing.

### **\*Additional Responsibilities:\***

- 1. \* System Design\*:** Assisting in designing firefighting, chiller water pipe, and ducting systems.
- 2. \* Collaboration with Other Teams\*:** Working with other departments, such as HVAC, mechanical, and engineering.
- 3. \* Testing and Commissioning\*:** Overseeing testing and commissioning of new systems.
- 4. \* Energy Efficiency\*:** Ensuring systems are optimized for energy efficiency and performance.
- 5. \* Compliance with Regulations\*:** Ensuring compliance with relevant codes, standards, and regulations.

### **\*Key Skills:\***

- 1. \* Strong knowledge of firefighting, piping, ducting, and HVAC systems.**
- 2. \* Leadership and team management skills.**
- 3. \* Excellent problem-solving and troubleshooting abilities.**
- 4. \* Attention to detail and quality focus.**
- 5. \* Effective communication and collaboration skills.**
- 6. \* Request materials as required at the site.**
- 7. \* Implement safety rules and regulation at the work place.**
- 8. \* Making the daily and monthly progress report.**

This role requires a broad range of technical expertise and supervisory skills, ensuring the reliable operation of critical systems.
