Summary

Architectural engineer passionate about designing modern architectural projects and creating practical yet aesthetic design solutions. Experienced in using design software such as Revit, AutoCAD, and Lumion, with advanced skills in Excel. Known for completing tasks efficiently and professionally, with flexibility in handling diverse work requirements and a creative mindset to deliver innovative designs that meet client needs and align with the latest architectural trends.

Skills

- Completing tasks professionally while maintaining quality and standards.
- Flexibility in handling diverse work challenges and requirements.
- Creative thinking to deliver innovative design solutions.
- Proficiency in Revit, AutoCAD, and Lumion for architectural design.
- Advanced Excel skills for project data management and analysis.
- Ability to work effectively in multidisciplinary teams.
- Time management and project organization to meet deadlines.
- Preparing and presenting technical reports and presentations to clients and colleagues.

What I Can Do

- Design and execute architectural projects using advanced design software.
- Prepare plans and 3D visualizations to illustrate design concepts.
- Manage and analyze project-related data using Excel.
- Provide creative design solutions that meet client requirements.
- Work efficiently and professionally while adhering to engineering standards.
- Organize and schedule tasks to ensure project completion on time.
- Collaborate with multidisciplinary teams to ensure smooth project execution.
- Prepare and present technical reports and presentations to clients and colleagues.

Education

Bachelor's, Degree in Architectural Engineering, Unaizah Private Colleges
