Professional Summary

Professional Civil Engineer with over 14 years of experience at the Ministry of Transport and Logistics Services, holding a PMP certification in project management. Extensive involvement in infrastructure, roads, and bridges projects across planning, supervision, and delivery phases. Strong background in contract management, risk control, quality assurance, and performance monitoring using tools such as Primavera, MS Project, and GIS. Proven ability to coordinate with stakeholders and deliver practical solutions that support efficient execution and safer transportation networks.

Professional Experience

- **Project Implementation Management - Member of the Main and Subcommittees for Traffic Safety | Ministry of Transport and Logistics Services | 2017–2024**
- Leading and implementing road and bridge projects from reviewing plans to final delivery according to standards.
 - Developing and implementing risk management and quality control plans while monitoring key performance indicators (KPIs) to ensure efficient implementation.
- Coordinate with government agencies, stakeholders, and the local community to ensure integrated efforts and facilitate implementation without delay.
- Prepare accurate and detailed follow-up reports, including progress rates, challenges, and proposed solutions, and submit them to senior management to support strategic decision-making.
- Direct supervision of contractors' and consultants' work, reviewing technical and financial statements, and verifying their compliance with contracts and the approved bill of quantities.
- Reviewing and approving temporary traffic diversions at work sites to ensure safety and smooth traffic flow.
- Analyzing traffic safety data and monitoring black spots on the road network, proposing practical solutions to reduce traffic accidents.

Certified Real Estate Appraiser | Ministry of Transport and Logistics | 2017 – 2024

- Delivered recommendations to enhance appraisal methodologies and improve operational efficiency.
- Prepared certified appraisal reports with accuracy and transparency, covering all technical and economic factors.
- Coordinated with technical committees and government bodies to finalize regulatory procedures and legal documentation.
- Contributed to compensation assessments for key projects such as the Ring Road & Al-Aqiq–Jarab Road, accelerating project progress.
- Valuated expropriated properties for strategic transport projects using approaches such as market comparisons & financial analysis.

Manager of Property Management | Ministry of Transport and Logistics | 2016-2017

- Continuous coordination with relevant committees and entities to expedite procedures and complete them efficiently.
- Managing financial compensation processes and ensuring their official documentation, while preparing the necessary project sketches.
- Monitoring the compliance of departments and relevant parties with regulations governing public property, and preparing periodic evaluation reports.
- Developing integrated systems for maintaining real estate records using modern databases to ensure easy access and transparency.
- Supervising the inventory and review of properties and real estate expropriated for the Ministry's projects, ensuring that all regulatory requirements are met.

Supervising Engineer – Administrative Buildings | Ministry of Transport and Logistics | 2014 – 2016

- Prepared technical reports and monitored all execution stages of administrative building projects.
- Managed contractors and consultants to ensure timely and accurate delivery.
- Applied occupational safety procedures across sites to ensure safe work environments.
- Supervised construction & finishing of administrative buildings, warehouses, & field centers in line with engineering standards.

Engineer & Contracts Supervisor – Road Maintenance | Ministry of Transport and Logistics | 2011 – 2014

- Applied GIS technology to analyze network conditions and issue precise technical reports.
- Monitored lighting and ventilation contracts in tunnels, ensuring compliance with technical specifications.

- Implemented PMS and IRI systems for periodic evaluation of road conditions and quality.
- Assessed contractor performance and produced detailed follow-up reports with improvement recommendations.
- Supervised preventive maintenance of vital roads such as King Khalid Pass and Al Baha–Taif–Abha Road.
- Issued work permits and coordinated with stakeholders for civil works at power stations.

Education

B.Sc. Civil Engineering | Al-Baha University | Graduation Year: July 2011

Memberships

- Saudi Council of Engineers | Professional Civil Engineer | Membership No.: 336624 | July 2017 – Present

Certifications

- Project Management Professional (PMP) | Project Management Institute (PMI) | 2026
- Accredited Valuation – Saudi Authority for Accredited Valuers | Riyadh | Mar 2018
- Practical Procedures in Property Expropriation for Public Benefit – Valuation & Compensation | Taqueem Academy | Oct 2018
- Project Supervision | Riyadh | Oct 2023
- Introduction to Road Safety Manual | Abha | Aug 2022
- Road Safety Inspection | Riyadh | Nov 2021
- Strategy Building & Strategic Planning | Riyadh | Mar 2021
- Supervisory Skills for New Managers | Riyadh | Mar 2021
- Risk Prevention for Road & Tunnel Maintenance Workers | Riyadh | Nov 2019
- International Federation – Transport Asset Management: Strategic Approach to Infrastructure | Riyadh | Feb 2018
- Quality Control for Road Projects | Dubai | Dec 2017
- Central Supervision of Project Execution | Apr 2017
- International Federation – Bridge Repair and Maintenance | Oct 2016
- MS Project Programming | Feb 2016
- Dispute Management in Construction Projects | Apr 2016
- Urban Planning | Aug 2012
- Supervision of Road Execution | Jordan | Oct 2013
- New Horizons – Computer Applications for Office Development | 2011

Workshops

- Special Specifications for Implementing Road Safety & Traffic Diversions | 2020
- Leadership Responsibility in Al Baha Roads | 2019

Skills

Soft Skills:

- Leadership
- Analytical Thinking
- Effective Communication
- Negotiation
- Decision-Making

Practical Skills:

- Project Management
- Quality Control
- Risk Management
- Road & Bridge Supervision
- Safety Data Analysis
- Property Management
- Real Estate Valuation
- Preventive Maintenance
- Report Preparation
- Engineering Supervision
- Strategic Planning
- Contract Management

Technical Skills:

- Primavera P6
- MS Project
- AutoCAD
- SAP

Languages

- English | Arabic
